Made in Europe

Multimedia Kiosks and Digital Mupis are developed and produced in Portugal.

The success of our company in the international market shows us that we have developed and produce excellent products and we should therefore be proud and confident in the future.

Multi touch
Functionality

The StyloW Model was developed specifically for indoor use, particulary for placing in walls.

This model is manufactured in stainless steel AISI304 or painted steel (RAL Colors) using steel plate of 1,5mm to 2,5mm which ensures the stability and rigidity of all structure.

The area where the computer is installed and possible peripherals (card readers, coin acceptors, etc.), is protected with access through a security lock and includes three power plugs.

On top of display are two integrated speakers that fits smoothly in the all structure.

The StyloW Model is normally equipped with a 32" display (19'', 22'' or other sizes are possible).

StyloW can be equipped with computers with diferent "performances" (CPU) with hard drives from 100 to 320 GB, 4 Gb Ram Memory, 128mb graphics card expandable to 512, 10/100 mb ethernet, and Windows 7 or 8. This kiosk can also be equipped with computers with other OS like Linux, etc.

Everything has been planned down to the smallest detail. The "clean" and round lines give you an elegance unprecedented in the field of multimedia kiosks wall.

The metal frame has also been designed to be as narrow as possible, in order to highlight only the display.

▶ The dimensions and specifications are given in graphical representation and may not correspond to the reality of the equipment. The dimensions shown are approximate and represent the equipment for acertain size display. The final dimension may vary depending display model and other components used. The client must request technical drawing for final validation (measures and specifications).

◀ StyloW
